

AURORA

It is the dawn time of the denim. Color is a power which directly influences the soul of the denim.

Original denim was dyed with dye from plant *Indigofera* to get deep blue color. Beside blue, denim can be colored with other dyes to get colors other than indigo.

With different fabric constructions, weight, and elasticity options, RFD fabrics offer unlimited options for white fabric: luxurious, garment dye with an authentic denim look, new surfaces and reflections.
